

Elevate your business.

Altitude is a fresh, young company with a **growing** reputation for **elevating** SMEs and like-minded business owners to **new heights**.

Our passion is your business

From our early years watching our parents grow their own businesses, to now with **over 40 years of experience** collaborating first-hand with owner managed business owners, we believe our **unique approach** - along with our amazing like-minded team - will set you on the path to **achieving your aspirations**.

The view from our peak

These are not just our core values, **these are our rules**. They really are the glue that holds everything that we do together; they are us and we are them - **it's serious stuff!**

We want to work with like-minded individuals and owner-managed businesses, who are ready to or already embracing the use of technology, to help achieve their business and personal aspirations. We do this by committing to 4 meetings per year that starts us on the journey to elevating you and your business.

Accountants and advisors typically work to the billable hour, but here at Altitude we bill based on outputs, not the time spent and are committed to adding value.

At Altitude, flexibility is the key to unlocking your potential. That's why we're happy to work around your priorities and will genuinely work to 'your' time. So, we will make it our business to accommodate you!

We want to help business owners meet their aspirations and we genuinely care about you and your goals. We are on this journey with you, growing our business, growing your business, introducing you to other businesses with the same goals and reaching new heights together.
